

Name _____

Math: Money - Coins

Bhagyamma lives in India. She used to earn 50¢ a day. Now with help, she can buy a few buffalos. She sells the buffalo milk to help earn money for her family. Now she earns \$2.40 a day.

Using any combination of coins, show 50¢ in the space below.

Using any combination of coins, show \$2.40 in the space below.

If Bhagyamma worked 5 days a week, how much money did she earn in one day? In one week?

If Bhagyamma works 5 days a week, how much money does she now earn in one day? In one week?
