

Name \_\_\_\_\_

**Math: Money**

**Health: Nutrition**

Bayamma Neerudi lives in India. She used to work on a farm earning 32¢ a day. But there was only work during 150 days a year. Her husband worked as a mechanic and earned 50¢ per day. They often lived on starch as their only food. Now with help she can buy a buffalo. By selling milk from the buffalo she earns more money. Now her family eats more nutritious food that includes milk, rice, vegetables and sometimes meat.

How much money did Bayamma earn in a week? In a year?

If her husband worked 5 days a week, how much money did he earn in a week? If he worked 52 weeks, how much did he earn in a year?

Bayamma's family used to eat only starch. Research to find out what kinds of food are starch. Draw pictures of what they used to eat.

After getting help, Bayamma's family is able to eat milk, rice, vegetables and sometimes meat. Draw a pictures of what they can now buy to eat.
